

Oticon Agil made me rediscover
the sound of my acoustic guitar

58 year old educator Birger Steen works in an activity centre for the mentally challenged . His recent upgrade to Oticon Agil is making a noisy workplace easier to handle -and playing his guitar an amazing experience.

When I'm working in the canteen I have to be able to communicate clearly - not only with other members of the staff but also the 30-40 people that use these facilities.

With my previous instruments the clatter of plates and cutlery could sound so sharp and uncomfortable that sometimes the only thing to do was to take them out. I would be absolutely exhausted at the end of the day.

Switching to very advanced Oticon Agil instruments has been like switching from a steam engine to a jet motor.

Everything sounds so natural - particularly the sound of voices - that I often completely forget that I am wearing them.

The fresh sound of the strings

I think the most amazing thing about getting these instruments was rediscovering the sound of my acoustic guitar. The strings sounded fresher than they have done in 25 years. When I heard that sound, tears came to my eyes. It was really something!
